# Instalando no Linux

Para instalar o MySQL no linux, é necessário ter a senha do root (sudo). Com a senha em mãos podemos iniciar.

É interessante confirmar se tem alguma atualização do apt (a ferramenta de pacote do Linux).

```
sudo apt update
```

Após confirmar se o `apt` está atualizado podemos fazer a instalação do MySQL.

```
sudo apt install mysql-server
```

Com isso, podemos verificar se o MySQL está funcionando:

```
service mysql status
```

Caso seja necessário parar o serviço de banco de dados MySQL:

```
sudo service mysql stop
```

E para iniciar o serviço de banco de dados MySQL:

```
sudo service mysql start
```
